Velocity® PM

POA MANAGEMENT HERBICIDE

TURN MIXED POA TO PURER TURF AT YOUR PACE

We know that managing turf with unwanted Poa can be challenging. Velocity® PM Poa Management Herbicide was developed to support the needs of your transition program. Velocity PM can gradually remove annual bluegrass (*Poa annua*) and roughstalk bluegrass (*Poa trivialis*), transitioning a Poa-mixed stand back to purer turf. Apply at lower rates and wider application intervals to slow conversion. Beyond selective removal of postemergence Poa and numerous broadleaf weeds, Velocity PM reduces Poa annua seedhead production while also suppressing the development and severity of dollar spot.

COMPETITIVE ADVANTAGES

Remove Unwanted Poa

- Selectively remove annual bluegrass and roughstalk bluegrass and numerous broadleaf weeds
- Suppress Poa seedhead production
- Flexibility to select the optimal program for your situation and desired speed of conversion

Dollar Spot Suppression

- Substantially suppress the development and severity of dollar spot
- Disease reduction for several weeks after the final application
- Suppression of dollar spot will be greatest when applied before the appearance of a significant dollar spot infection

Best Management Practices

- Use lower rates and wider application interval for slowest conversion
- **Do not** tank-mix with wetting agents, spreader stickers, surfactants or other adjuvants
- **Do not** mow or irrigate within 4 hours after application
- **Do not** make applications if soil is at field capacity or rain is forecasted within 4 hours
- **DO NOT** apply when daily high air temperatures are consistently below 60°F or above 90°F
- **DO NOT** apply to turfgrass exhibiting symptoms of Pythium blight or growing under stress due to drought, high or low temperatures, low fertility, heavy thatch, mechanical injury or other stresses

AT-A-GLANCE INFO

EPA REG. NO.	59639-258
ACTIVE INGR.	bispyribac sodium (37.57%) (3.7 lb / gal)
FORMULATION	suspension concentrate
CHEM. FAMILY	priimidinyl benzoate
SIGNAL WORD	caution
RESTRICTED	no
PACKAGE SIZE	pint bottle (8 per case)

Velocity® PM

POA MANAGEMENT HERBICIDE

KEY USES

- Golf course fairways and tees
- Residential and commercial turf
- Sod farms
- Athletic fields

TURF TYPES

- Creeping bentgrass
- Perennial ryegrass
- Tall fescue
- Dormant Bermudagrass
- Dormant Bermudagrass overseeded with perennial ryegrass

WEEDS CONTROLLED

- *Poa annua*
- *Poa trivialis*
- Common Chickweed
- Sticky Chickweed
- Large Clover
- Hop Clover
- White Clover
- Dandelion
- Henbit
- Lawn burweed
- Parsley-piert
- Broadleaf Plantain
- Buckhorn Plantain
- Swinecress
- Yellow nutsedge
- Yellow woodsorrel

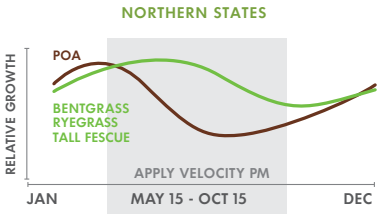
APPLICATION STRATEGY

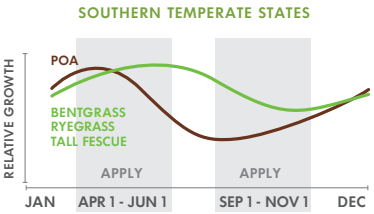
USE SEASON

Apply only when cool-season turfgrass is actively growing. The use season will vary according to location.

APPROXIMATE TIMING

Applications can occur when the turfgrass is actively growing yet should be focused on the time of year where Poa removal is most desired.





USE SUMMARY

Maximum weed control is observed when daily air temperatures are between 70 and 85°F. Avoid application of Velocity PM in the spring before grass resumes active growth, or in the fall after growth slows.

Velocity PM may cause chlorosis when applied to the desirable turfgrass. The onset, intensity and persistence of symptoms are at least partially influenced by environmental conditions (e.g., temperature, cloud cover and rainfall) and cultural practices. When air temperatures are below 60°F symptoms appear more slowly and persist longer. Velocity PM performs best when grass is actively growing, and daytime air temperatures are between 70 to 85°F during and after application.

Velocity PM may mildly discolor desirable turfgrass species such as creeping bentgrass and perennial ryegrass. Discoloration begins 7 to 14 days after application. Vigorously growing grasses should outgrow symptoms within 14 days after the last application. If temporary turf chlorosis is a concern, avoid treating patches of turf that are surrounded by untreated areas.

See product label for complete directions for use.
