

BEE LAWN SEED MIXTURE

Protect at-risk pollinators

Conserve water

Mow less

The **Twin City Seed Bee Lawn Seed Mix** is designed to provide high-quality food for our at-risk pollinators while maintaining the typical recreation associated with a home lawn. Bee lawns need less watering, mowing, and fertilizer, making them eco-friendly. University of Minnesota research conducted by our in-house conservation specialist James Wolfin found that bee lawns provide food for more than 60 bee species! Protect pollinators and improve your carbon footprint by planting a bee lawn!

Suggested maintenance: Bee lawns are low maintenance *after* they are established. Be sure to implement a light and frequent watering program after seeding. Once mature, we recommend maintaining bee lawns at a taller height than what is typical of a traditional lawn.

COMPOSITION

23.5% Creeping Red Fescue
23.0% Chewings Fescue
23.0% Hard Fescue
23.0% Sheep Fescue
4.5% Dutch White Clover
2.6% Self-Heal
0.4% Yaak Yarrow

SEEDING RATES

5 lbs/1000 sqft

ESTABLISHMENT

Germination in 7-15 days
