

# BEE LAWN OVERSEEDER

PROTECT POLLINATORS AND CONSERVE NATURAL RESOURCES

Protects our at-risk pollinators

Exceptional Drought tolerance

Environmentally friendly

Low maintenance

Reduced (or no) mowing

The Twin City Seed Bee Lawn Overseeder is a flowers-only option for folks that want to add pollinator-friendly flowers to their lawn. University of Minnesota research (conducted by our in-house conservation specialist James Wolfin) found that the flowers in the bee lawn mix provide food for more than 60 bee species and other pollinating insects! Protect pollinators in your yard and reduce your carbon footprint by planting a bee lawn!

**Suggested maintenance:** Bee lawns are low maintenance *after* they are established. Be sure to implement a light and frequent watering program after seeding. Once mature, we recommend maintaining bee lawns at a taller height than what is typical of a traditional lawn. Letting a bee lawn grow out to at least 6" will ensure that all flowers within the bee lawn mix are able to bloom throughout the growing season.

## TCS OVERSEEDER

- 15% Dutch White Clover (2.4oz)
- 9% Self-Heal (1.44 oz)
- 1% Creeping thyme/yaak yarrow (0.16 oz)
- 75% SUSTANE 1-1-1 SOIL BUILDER

## SEEDING RATES

- |               |               |
|---------------|---------------|
| New turf      | Overseeding   |
| 1 lb/500 sqft | 1 lb/500 sqft |

## ESTABLISHMENT

- Germination in 7-15 days under ideal conditions
- Flowering time varies by species
