USE	LBS PER 1,000 SQFT	LBS PER ACRE
New lawn seeding	7 – 9	300 – 400
Overseeding	5 – 7	225 – 300

BLUE RESILIENCE combines elite turf-type tall fescues from the ‘Resilience II’ blend with Blue Gem Kentucky bluegrass, known for its quality and **drought tolerance**. This mix features advanced tall fescues with rhizomes for self-repair, **fast establishment**, **traffic resilience**, **quick recovery**, **dark color**, and **fine leaf texture** that pairs well with bluegrass. Adding Kentucky bluegrass enhances **winter hardiness**, as it tolerates ice cover better than tall fescues. This mix is ideal for lawns that experience recreational traffic like neighborhood kickball and fetch. With excellent drought tolerance, Blue Resilience thrives in various soil conditions and sun-to-shade areas—perfect for an easy-to-maintain, pristine lawn!
