NEW LAWN RATE: 6-9 lbs. per 1,000 sqft. | 250-400 lbs. per acre
OVERSEEDING RATE: 5-8 lbs. per 1,000 sqft. | 225-350 lbs. per acre

ECO SEED™ Low Grow Fescue Mix combines fine fescues for an attractive, **low-maintenance** turf, whether **mown or unmown** (reaching 10–12 inches). It thrives in **full sun to heavy shade**, adapts to various soil types, and is **drought-tolerant**. Ideal for challenging areas like slopes, it supports wildflower growth and features fine-textured turf. Approved by the Turfgrass Water Conservation Alliance.

Suggested Maintenance: Best results are achieved under low management conditions with limited fertilizer and irrigation. It can be mown between 2 and 4 inches but does not require regular mowing. If left unmown, it is best to mow the area and remove the clippings once per season to rejuvenate the turf stand.

ECO SEED

Low Grow Fescue

COMPOSITION

25% Blue Mesa Sheep Fescue
25% Viking H2O Hard Fescue
25% Enchantment Chewings Fescue
25% Celestial Creeping Red Fescue
