

MARVEL

CREEPING RED FESCUE

Festuca rubra var. rubra

DESCRIPTION

Marvel Creeping Red Fescue is our latest release adapted for use in high quality sun and shade mixes and low input mixtures. It is an elite variety with fine texture and a rhizomatous spreading habit, better color, persistence, wear tolerance, and improved density. Marvel exhibits excellent performance when included at 15-35% of the mixture by weight in general cool-season mixes.

APPLICATION

- Use in low input mixtures and blends requiring reduced fertilizer, irrigation and mowing to save time and money
- Sun and shade mixtures for lawns and golf course roughs
- Close-cut tee and fairway overseeding, divot mixes, and interseeding into Bentgrass/Fescue turf

GEOGRAPHICAL ADAPTATION

Cool-season and transition zones, arid regions

PRODUCTION AREAS

Pacific Northwest

SEEDS PER POUND (APPROXIMATE)

~365,000

FEATURES & BENEFITS

- Excellent for both high and low maintenance areas
- Strong seedling vigor and establishment – great for overseeding
- Contains endophytes for improved insect resistance
- Handles minimal mowing and reduced fertilizer
- Performs under tee and fairway maintenance
- Dense, fine, brilliant color
- High performance, dependable, adaptive

RATE*

- Overseeding: 3 – 4 lbs./1,000 ft².
- New Seeding: 5 – 6 lbs./1,000 ft².

*local conditions vary and dictate rates
