

NSF 8011 Q PLUS

A New Source Forages Brand

NSF 8011 Q Plus - This variety is a multi-foliolate variety with excellent winter hardiness. Offering the producer higher quality with outstanding digestibility and yield. NSF 8011 Q Plus is adapted to perform across the fall dormancy 3 and 4 production areas. It is a lower lignen type alfalfa under good management. It recovers extremely fast and carries an excellent agronomic disease package. This variety will respond to high management on productive soils.
