

OBSIDIAN

Perennial Ryegrass Blend

COMPOSITION

50% Fireball Perennial Ryegrass

50% Dark Matter Perennial Ryegrass

*Or equivalent depending on availability

Use	lbs per 1,000 sqft	lbs per acre
New lawn seeding	7 – 9	300 – 400
Overseeding	5 – 7	225 – 300

The Twin City Seed **Obsidian Perennial Ryegrass Seed Blend** features two elite cultivars of perennial ryegrass, both of which show off their dark side, including the darkest green variety on the market – ‘Fireball’. This blend exhibits rapid establishment, germinating in as little as 5 days, strong wear tolerance and creates a dark green, uniform lawn.

Suggested Maintenance: Best results are achieved when installed with a light and frequent watering schedule upon establishment. This consists of watering 2+ times per day until the upper most layer of soil is moist. Established stands of Obsidian will perform best with two or more fertilizer applications per growing season and regular irrigation (1-2x per week). Due to its dark green color, extra fertilizing for color is no longer needed. Obsidian is best suited for cool-season climates but may be used for overseeding projects in the transition zone.

Dark Green Color
