

FINE FESCUE

SIERRA VISTA is a true Sheep's Fescue (*festuca Ovina*) which is very limited in today's marketplace. It is engineered for landscape areas, golf course roughs, low maintenance turf and native/reclamation areas. **SIERRA VISTA'S** low rate of leaf growth allows for reduced mowing, it also has lower ET rates for less water consumption and uses less fertilizer. **SIERRA VISTA** can be mowed for turf or left unmowed for a native look.

SIERRA VISTA maintains its color during drought conditions and also during the winter growing months. **SIERRA VISTA** is a bunch type grass with a waxy coated narrow leaf texture and a soft blue-gray color which provides a nice color contrast. **SIERRA VISTA** also can be used in soil erosion mixes, shade mixes & reclamation mixes. **SIERRA VISTA** can also be mixed with other fine fescues, wildflowers, perennial ryegrass, native warm & cool season grasses and Kentucky bluegrass.

FACTS:

- Blue-gray leaf color
- Low maintenance
- Shade tolerant
- Fine leaf texture
- Quick spring green up
- Excellent winter color
- Lower input requirements

APPLICATIONS:

- Low maintenance lawn
- Golf Course Roughs
- Native areas
- Landscape areas

SEEDING RATES:

- Permanent Turf:
5-7 LBS/1000 sq. ft.
- Overseeding:
3-4 LBS/1000 sq. ft.
