

# SHADY LAWN SEED MIXTURE

SHADE TOLERANT LAWN SEED

Drought tolerant

Fast establishment

Low maintenance

Strong shade tolerance

Wide adaptability

Shady Lawn Seed Mixture provides strong shade tolerance requiring normal to low maintenance. The turf type tall fescue and Chewings fescue maintains high quality turf where 30 to 60% shade exists. In less shaded areas, the Kentucky bluegrass and perennial ryegrass will thrive. Shady Mix can be used successfully on a variety of soils existing in most sites, including home lawns, commercial properties, parks, schools, and other turf areas receiving normal to low maintenance. Drought tolerance of this product is recognized through approval of the Turfgrass Water Conservation Alliance.

**Suggested Maintenance:** Best results are achieved with one or two fertilizations per growing season and irrigation as needed to prevent plant dormancy. The recommended mowing height is 2 – 3 inches; however, higher heights of cut will increase the shade tolerance of this mixture.

## COMPOSITION

- 20% Lifeguard Turf Type Tall Fescue
- 20% Relentless Turf Type Tall Fescue
- 20% Enchantment Chewings Fescue
- 20% Mollala Perennial Ryegrass
- 20% Mazama Kentucky Bluegrass
- \*Or equivalent depending on availability

| Use              | lbs per 1,000 sqft | lbs per acre |
|------------------|--------------------|--------------|
| New lawn seeding | 5 – 7              | 225 – 300    |
| Overseeding      | 4 – 6              | 175 – 250    |
