

KENTUCKY BLUEGRASS

TURF

Starr
Kentucky Bluegrass
Truly, a Starr is born!

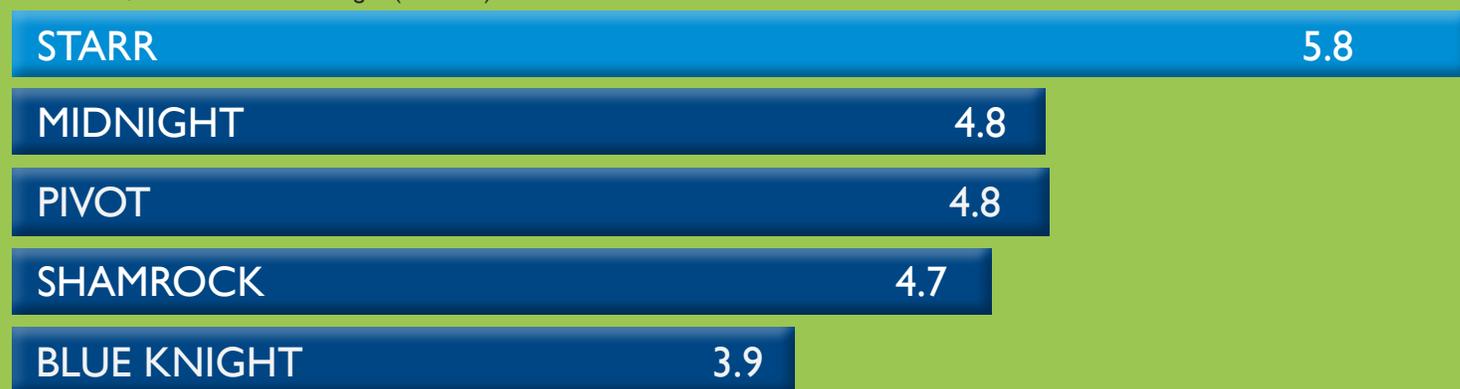

STARR Kentucky bluegrass (GO-2628) topped the charts at the 2017 NTEP Kentucky bluegrass trials. Highlights of this solid performer include rapid establishment and year-round turf density. Starr's winter color is superior to that of many elite type bluegrasses and has early spring green up characteristics, making this bluegrass one of the best in summer performance available today.

- Rapid establishment
- Superb winter color
- Excellent seeding vigor
- Awesome turf quality

PERFORMANCE DATA

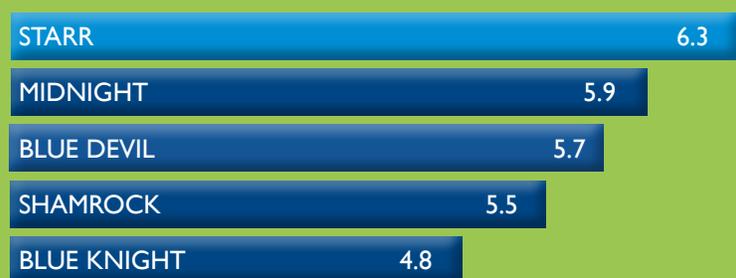

SEEDLING VIGOR

NTEP 2018 data. Seedling vigor of Kentucky bluegrass cultivars: 1-9, where 9 = maximum vigor (LSD=0.8)

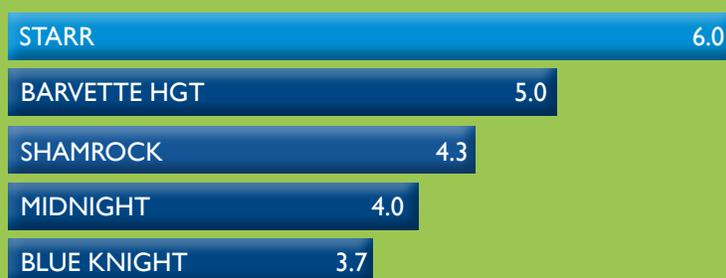

TURF QUALITY

NTEP 2018 data. Turfgrass quality ratings of Kentucky bluegrass cultivars grown at ten locations in the US: 1-9, where 9 is ideal (LSD=0.2)

WINTER COLOR

NTEP 2019 data. Winter color ratings of Kentucky bluegrass cultivars: 1-9, where 9 = complete color retention (LSD=1.5)

Starr has been entered in trials under the designation GO-2628
